

Standards Forum at Sibos

Where business and standardisation meet

Sibos 2011 Toronto

19-23 September

What is Sibos?

Every year, Sibos brings together influential leaders from financial institutions, market infrastructures, multinational corporations and technology partners to do business and shape the future of the financial industry. Facilitated and organised by SWIFT for its community, Sibos is much more than a conference and exhibition. It is a unique platform to collaborate and take collective action in payments, securities, cash management and trade. With the power to draw over 8,000 participants from across the globe, Sibos is unparalleled in its reputation to reach the entire financial services industry.

The Standards Forum at Sibos

The Standards Forum at Sibos is the place to learn about the latest standards trends and developments. Throughout Sibos week, the Standards Forum offers a comprehensive programme of activities on a dedicated – green – stand within the exhibition (J127), where it welcomes business attendees, standardisers and vendors alike. The Forum is organised by SWIFT Standards with the support of leading standardisers, financial institutions, standards organisations, vendors and market practice groups.

Why attend?

Over the years, the Standards Forum has become a networking hub for anyone interested in standards-related issues. The numerous debates, networking opportunities and education sessions guide you through today's standards world, create learning opportunities and give you the chance to meet field experts in an informal setting.

This year's key themes are **Market Practice and practical standards implementation; standards, technology & innovation; and a changing standards landscape.**

The programme includes:

- **Food for Thought:** controversial lunchtime debates between key players from the business and the standardisation world
- **Meet the Implementer:** standards implementers share their experiences over networking and drinks
- **Education sessions:** presentations, demos and showcase sessions that provide you with hands-on, in-depth knowledge of a variety of standards topics
- **Panel discussions and interactive presentations:** standards and business experts debate current issues, share their standards world view – join in!

We look forward to seeing you in Toronto.
